Dear Lee Khai,

To get the full text after you have searched Scopus, please click the button "View at Publisher" instead of "Linksource" button.

The screenshot shows the Scopus search interface. At the top, the search criteria are 'TITLE-ABS-KEY ("cerebral palsy")'. The results show 31,687 document results. On the left, there are filters for 'Year' (2012-2016) and 'Author Name' (Miller, F., Graham, H.K., Boyd, R.N., Nelson, K.B., Doyle, L.W.). The main list of results includes:

- 1 Oligodendrocytes: Cells of origin for white matter injury in the developing brain. Tok De
- 2 Prenatal determinants of brain development: Recent studies and methodological advances. Bar
- 3 Consumption of broccoli sprouts during late gestation and lactation confers protection against developmental delay induced by maternal inflammation. Ngt Shk E A
- 4 Does early communication mediate the relationship between motor ability and social function in children with cerebral palsy? Lip: Col B.,

Each result has a 'LinkSource' button and a 'View at Publisher' button. The 'View at Publisher' buttons are circled in red in the original image.

Once you click "View at Publisher" another window will open the publisher's web page giving you access to the PDF or HTML full text. Please bear in mind that this will depend on the Library's subscription. If the journal is not subscribed by the library you will not be able to download the PDF. If that happens you may email to us ([rujukanpht@usm.my](mailto:rujukanpht@usm.my)) the details of the article you would like to have, and we can try getting the article through Inter-Library Loan.

Hope this information helps.

Thank you.

**Maklum Balas / Feedback: \*** I cannot link the journal source through scopus, which usually i did to find the full test of juornals in pdf form. when i clicked on the link source button, it says "We could not authenticate your request. Please sign in.", instead of directly linked to ezproxy page before.
